A PROPOSAL FROM GONDAR, TO GONDAR

EXPLORE GONDAR

ጎንደርን ያስሱ

Bring the world to Gondar.

PRESENTED TO

The Honorable Kentiba of Gondar
and the Gondar City Administration

SEFED STUDIO · OCTOBER 2026 · V15

Gondar already has the destination.
Now build the system around the visitor.

≈ 2M

guests the City prepared for at Timket 2026
The City's own estimate

Source: Gondar City Administration, 13 Jan 2026, reported by Prensa Latina.

1.4M+

international visitors to Ethiopia, 2025/26
$5.2 billion in tourism and related revenue

Source: PM Abiy Ahmed, 1 July 2026, as reported by Xinhua and Prensa Latina.

UNESCO

Fasil Ghebbi (1979) and **Timket** (2019)
Two UNESCO listings in one city

The gap is not the attraction. It is the journey to it.

Discovery is scattered
Visitors jump between sources before they know what is official.

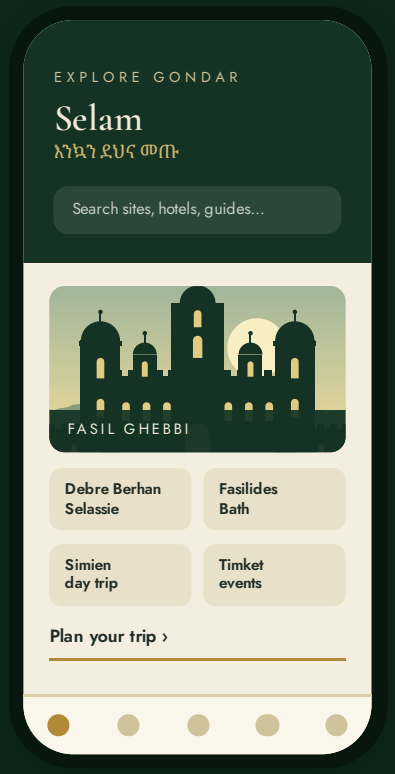

Trust is fragmented
No single official place verifies guides, rides, prices or news.

The visit can break down
A visitor can arrive with no clear plan, fair price or help point.

The City lacks the picture
Live data on arrivals, sites and demand is hard to see in one place.

One system.
One visitor journey.
One City-controlled source.

The visitor gets one clear path to discover, plan, book and stay informed. The City controls what is published, who is verified and what visitors are told.

Visitor App
የጎብኚ መተግበሪያ

LIVE SYNC

City Command Dashboard
የከተማ መቆጣጠሪያ

Discover & plan
Sites, routes and an AI guide.

Trusted providers
Verified listings and prices.

Safety & updates
SOS, news and official notices.

City visibility
Live tourism data.

Turn questions into a complete visit.

From first search to the last day.

Find what matters
Sites, stories, hours and events.

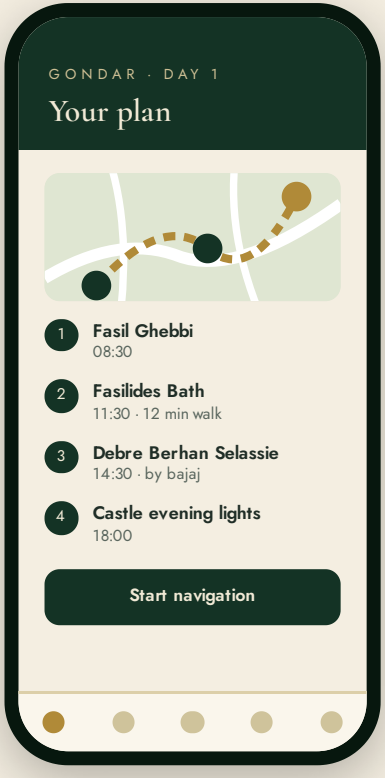

Build the trip
A realistic day plan with route, time and distance.

Choose with confidence
City-verified hotels, guides and bajaj with posted prices.

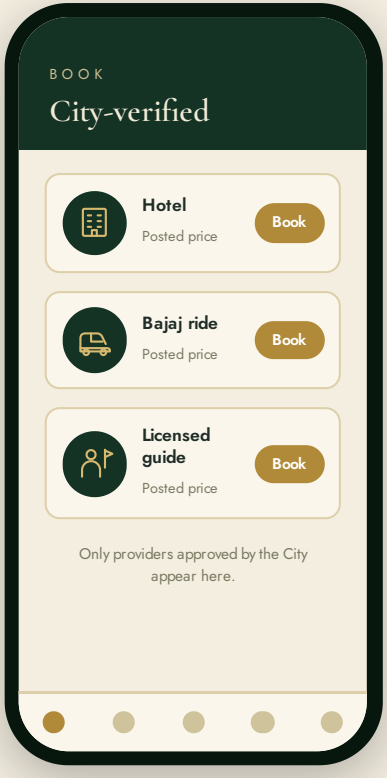

Stay connected
Ask Gondar AI, offline access and official updates.

Discover

Plan

Book

Before the trip
Discover and plan with one trusted source.

In the city
Navigate, book and stay informed.

After the trip
Review, share and return.

ILLUSTRATIVE SCREENS

Trust before *it breaks.*

A visitor needs to know what happens if something goes wrong, and who is responsible for the response.

Visitor taps SOS
One press shares location with the City Safety Desk.

City Safety Desk
The City sees the request and follows its procedure.

Responders
Police / ambulance contacted by the desk or authorised link.

ILLUSTRATIVE SCREEN

Only when staffed
SOS is active when the City can answer.

Private by design
Location is shared only to get help.

Always free
Safety is never behind a paywall.

Free safety notices keep every visitor informed: roads, closures and safe routes.

The City sees *the system it is managing.*

Not just a website — an operating layer for tourism.

Control the market

Approve providers, listings and posted prices before visitors see them.

Control the message

Publish official event, road and safety updates instantly.

Control the evidence

See arrivals, popular sites and trends in one place.

Plan with the weather

Live forecast for today and the next 7 days, on the City screen and in visitors' plans.

The visitor gets clarity. The City gets visibility.

One Bureau focal person. Trained staff run the system.

ILLUSTRATIVE SCREEN · SAMPLE DATA ONLY · NO REAL BUSINESS IS SHOWN

Ask Gondar.
A guide that knows the city.

PREMIUM FEATURE

A Premium feature for visitors: chat in Amharic or English and get answers the City has approved. The City team can ask its own numbers too.

ILLUSTRATIVE SCREEN

Only City-approved answers
It reads only the information the City gives it.

Only Gondar and the Amhara region
For other topics it says it can only help with Gondar.

It never guesses
Not sure? It says so and shows the Safety Desk number.

Amharic and English
One chat for foreign visitors and Gondar's diaspora.

1 Visitor asks › 2 Reads City-approved info › 3 Answers with the source › 4 Not sure? Safety Desk

Ask the City
FOR THE MAYOR'S TEAM

Ask your own numbers in plain words: *"How many guests came on Saturday?"* The AI answers from the dashboard and drafts notices in Amharic and English.

Live weather
ON THE DASHBOARD

Today and the next 7 days on the City screen. The AI uses it too: *"Rain after 3 pm — see the churches first."*

Today Tue Wed Thu

We asked Gondar first. *The first answers are yes.*

Before asking the City, we asked the city. We opened a partner form and spoke with local bajaj drivers and guides. They want to join.

SIGNED UP

Bajaj drivers

Drivers we spoke to joined the pilot list through our form.

SIGNED UP

Guides

Local guides joined the pilot list and want to be City-verified.

NEXT STEP

Hotels

We invite hotels next, with the City's endorsement behind us.

How we tested it

1 **We opened a partner form**
A simple sign-up for bajaj drivers, guides and hotels.

2 **We talked to providers**
Bajaj drivers and guides liked the idea and signed up.

3 **The City checks each one**
Nobody appears to visitors until the City verifies them.

A team already at work — *from Gondar and Addis Ababa*

Software team

Built the first working visitor app, and is now building the City dashboard.

Film & photo team

Our own crew brings Gondar's castles and Timket to life in photos and film.

Partner team

Opened the partner form and signed up the first bajaj drivers and guides.

Providers are ready.

Now it needs the City's go-ahead.

More join once the City endorses the pilot.

Designed to *keep running.*

The public service stays open. Optional paid features and real bookings create a path to cover ongoing running costs.

Free

EVERY VISITOR

- Discover sites, maps and verified listings
- Honest guide ratings
- SOS, emergency numbers and safety notices
- Safety is always free

Premium

OPTIONAL UPGRADE

- Ask Gondar AI chat
- Official city news, posted anytime
- Full day-by-day planner
- Offline guide packs + audio guides
- Virtual tours (later phase)
- Priority booking help

Bookings

THROUGH THE APP

A small commission applies only when a real booking happens, paid by the provider.

The visitor always sees the posted price.

Where it goes

- Hosting, security and backups.
- Support, updates and training.
- More guests reaching Gondar providers.

A system that can support itself

The goal is simple: keep the visitor side useful, keep safety and emergency information free, and create a sustainable operating model.

- City verification is free for providers
- No paid ranking — the City decides who appears
- Commission only when a booking happens

What Gondar gains.
What makes it possible.

A trusted city welcome
One official digital entry point for visitors.

Live tourism intelligence
Arrivals, sites and seasons visible in one place.

City-owned control
The City decides what is published.

More local tourism activity
More trusted paths to local hotels, guides and rides.

What the project needs

Official endorsement
Authority to verify and onboard providers.

Public QR and screens
Airport, hotels, castle gate and bus station.

Safety Desk
Staffing and the link to police / ambulance.

Timket 2027 pilot
One named focal person from the City.

Built for Gondar to own, operate and grow.

Why this fits *Gondar.*

Built and ready to show
A working first app exists today, and the first local partners have signed up.

From Gondar, for Gondar
Founder born and raised in the city. We know Gondar, so the system fits it and is not copied from elsewhere.

City-first design
Approvals, official content and tourism data stay under City control.

Culture + technology
Software, photography, film and virtual tours can live in one system.

Prove it, then expand
Start with Timket, measure what happens and grow from real results.

Support through launch
If the City agrees, we manage the project from start to finish. One year of fixes and training, and year-1 hosting, are in the agreed price.

Start in Gondar.
Build the model here.
Expand only when the results are clear.

October
First partners signed up. Demo meeting: see the working app.

November
City go-ahead. The City verifies the first partners.

December
Finish the system and AI guide, train staff, release the app.

January 2027
Timket pilot: guide, AI, notices, verified listings, live counts. SOS where the Desk is staffed.

February
Report results and agree the next phase.

LET US BRING THE WORLD TO GONDAR

ዓለምን ወደ ጎንደር እናምጣ

The first partners are ready. The next step is simple: see the system working, agree the pilot, and decide commercial terms once the City wants to move forward.
